These pages include a curated set of bioinformatics and data resources that have been compiled by members of the International Arabidopsis Informatics Consortium (IAIC) and curators at TAIR. This is not a comprehensive list; if you know of a resource that you think should be included, please send us an email.

**Search** within these pages for Arabidopsis community bioinformatics tools and data resources. You can use labels for data types such as 'proteomics' or 'gene_expression' or actions such as data submission or data analysis.

**Browse by subject portals**

- Epigenomics Resources
- Education and Outreach Resources
- General Databases
- Gene Expression/Transcriptomics Resources
- Metabolomics Resources
- Mutant and Mapping Resources
- Proteomics Resources

Stock Centers (DNA, Seeds, other Physical Resources)
