

"Most Wanted" Arabidopsis Genes

We have identified sets of Arabidopsis genes that are lacking functional annotation data in TAIR.

If you have information about the function(s) for any of these genes you can submit data (e.g. GO annotations, phenotypes) directly to TAIR

https://www.arabidopsis.org/doc/submit/functional_annotation/123

or email us at curator@arabidopsis.org to discuss how to integrate your data.

Please help us out by sharing your data- or figuring out what these genes do!

List of genes with unknown function, process and component (ND annotations only)-Updated 1/06/2020
